

XM radio is a valuable service that I pay for and therefore should not have any restrictions on content they provide to their listeners. My guess is that most of the listeners to XM travel for work or personal quite a bit like I do and the traffic & weather they provide is an extremely helpful service. I wish that they would add more cities to this list, including my hometown of Nashville, TN. Please do not attempt to restrict the services they are providing to their paying customers as they are doing a great job of listening to what their customers want.
